

ProjectWise – Creating PDF Cross Sections

Creating Cross Section Sheets through Renditions in ProjectWise

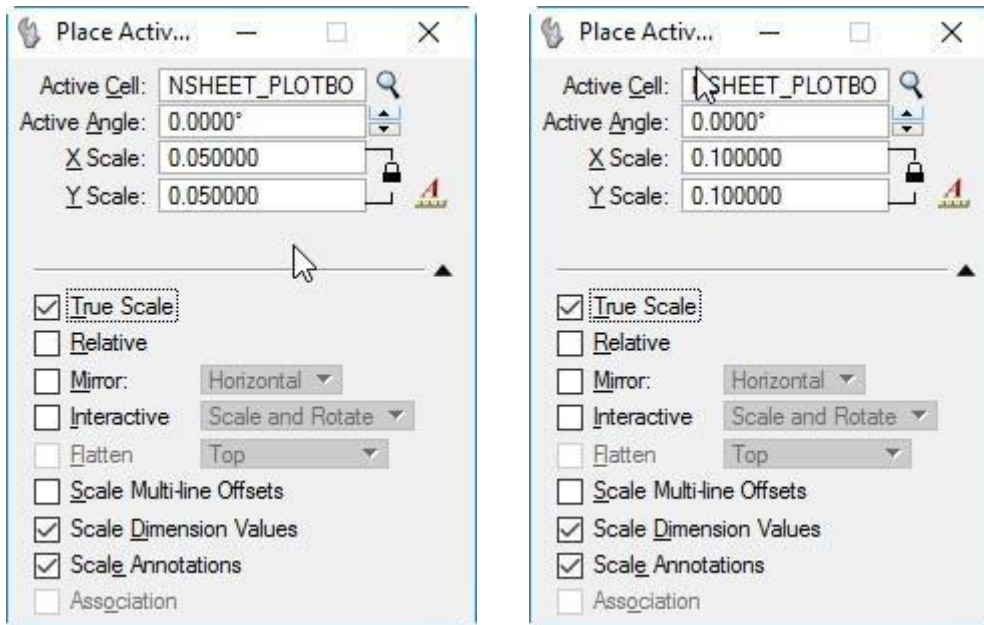

Make sure your cross section file has the correct naming format.
This is where the cross section sheet names will come from. (0123-456-789
c501_x.dgn)

You must place a border on all of the sheets by Place Active Cell Matrix.
The border is what determines where the sheets will be cut.
New sheets created after ProjectWise Migration already have this border.

- Open your cross section file in Microstation.

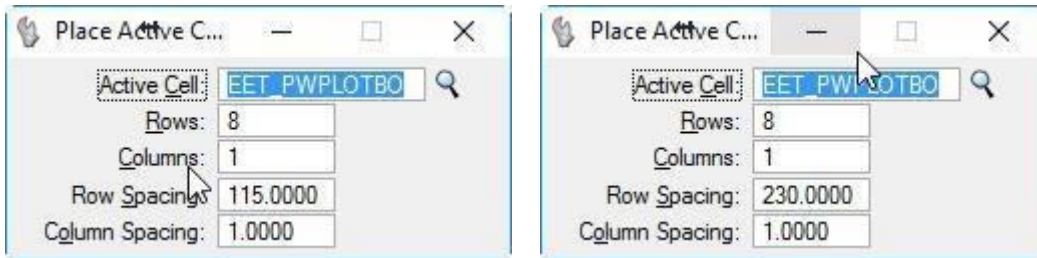

To set the cell

- Select Place Active Cell
- Choose or key in DES_PLANSHEET_PLOTBO
- Set the correct scale depending on 5 or 10 scale cross section sheets.

- Select Place Active Cell Matrix
- Fill out the information below
 - Rows - The number of sheets you have in the stack
 - Columns & Columns Spacing is always 1
 - Row Spacing - 115 for 5 scale or 230 for 10 scale.

ProjectWise – Creating PDF Cross Sections

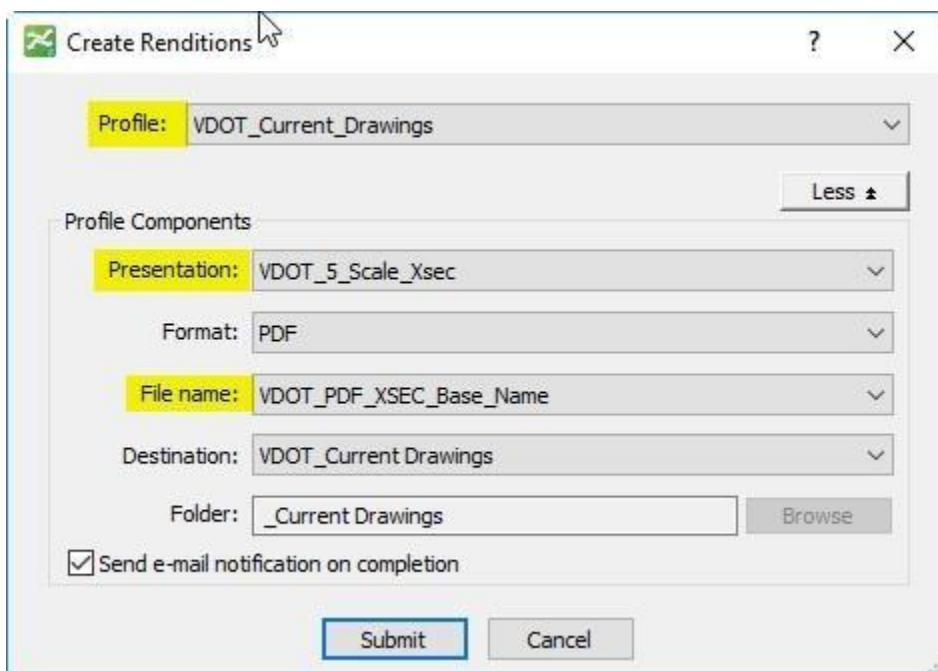

- Snap to the bottom left hand corner of the first cross section sheet in the stack to place the cell array.
- Check the file back in to ProjectWise.

In ProjectWise

- Right click on file
- Select Create Renditions

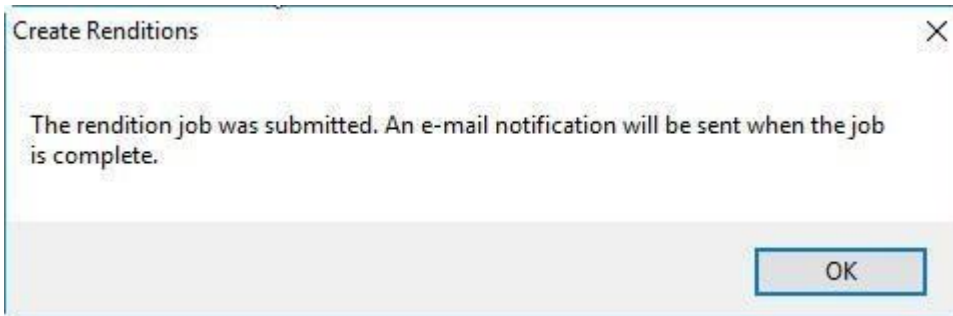

For Cross Sections

- Fill out the box as shown below
- Click Submit
 - Set the Profile for either Current Drawings or Plan File Room
 - **Set the Presentation for 5 or 10 scale Cross Sections.**

ProjectWise – Creating PDF Cross Sections

The following dialog will pop up and you can click OK.

You will receive an email like below when your files are ready. If you click on any of the links in the Success History box, it will take you to the file location in ProjectWise.
